

# ROAD ACCIDENTS IN DANGERSHIRE

Look carefully at the information shown in the tables below

## Number of children (0-15 year olds) in pedestrian accidents in Dangershire

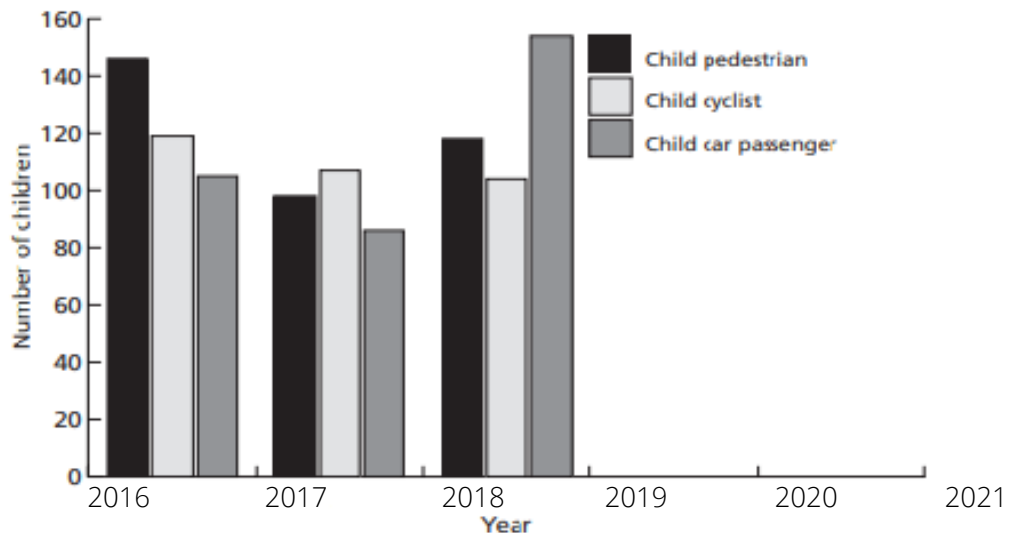

2016	2017	2018	2019	2020	2021
146	119	105	101	122	102

## Number of children (0-15 year olds) in bicycle accidents in Dangershire

2016	2017	2018	2019	2020	2021
98	107	86	105	101	67

## Number of children (0-15 year olds) in car accidents in Dangershire

2016	2017	2018	2019	2020	2021
118	104	154	127	150	136

## Things to do

1. Put all information shown in the three tables into a bar chart like the one above.
2. Write three sentences analysing the data in the table. For example - In 1999 there were more accidents to child pedestrians than accidents by bicycle or car.
3. Over the years has the number of children in cycle accidents in Dangershire increased or decreased?
4. Since 1999 has the number of pedestrian accidents in Dangershire increased or decreased?

Write all your answers in proper sentences

## Think and write

1. Write a list of reasons why you think pedestrian accidents happen. Give your list a suitable title.
2. Write down how you would stop children or babies being injured whilst travelling as passengers in a car?
3. Think about how you would reduce the number of pedestrian accidents in Dangershire.
4. Write your answer in point form.
